About

Full-Stack Software Engineer with experience building production internal platforms used by 50+ operational agents. Skilled in React, Node.js, Express, MySQL, and scalable backend API development. Strong foundation in Java, Data Structures & Algorithms, and system design fundamentals. Passionate about building high-performance software systems and solving complex engineering problems.

Experience

Software Developer | Firstclose Solutions, Pune

December 2025 – Present

- Designed and built three internal enterprise platforms (**Agent Management System, Customer Management System & HR Management System**) using React, Node.js, Express, and MySQL.
- Developed a dialer-integrated Agent Management System enabling 50+ agents to track loan collection activities, manage customer data, and streamline operational workflows.
- Built REST APIs and optimized relational database schemas to support scalable internal operations and real-time data tracking.
- Managed end-to-end development lifecycle including requirement analysis, system design, backend development, frontend UI implementation, and deployment.

Software Development Engineer Intern | Fingspace

June 2025 – Nov 2025

- Participating in end-to-end development (PRD analysis, DB design, API development, and deployment) for production-grade web applications.
- Developing **Hangar-HQ**, an exam preparation platform for DGCA students, building backend features for mock tests, analytics, JWT authentication, and secure sessions using the MERN stack.
- Built **Arrivo**, an MVC-architecture travel booking platform featuring user authentication (Passportjs), interactive maps (Leaflet API), image uploads (Cloudinary), and server-side rendering (EJS).
- Optimized database schemas using Mongoose to reduce query times and collaborated with cross-functional teams to debug, review code, and deploy updates via Git/GitHub.

Data Analyst Intern - Codaaz Software Pvt. Ltd.

Jan 2025 – May 2025

- Performed in-depth data analysis utilizing Python, Excel, SQL, and Power BI to support business intelligence initiatives. Collaborated with departments to identify data needs and deliver insights.
 - Designed and implemented interactive dashboards and visual reports using charts, pivot tables, slicers, and trend analysis. Enhancing the decision-making processes of internal teams.
-

Skills

Programming Languages: Java, JavaScript, Python, SQL

Frontend Development: React.js, Next.js, HTML5, CSS3, Bootstrap, Tailwind CSS, Shad CN, EJS, Material UI

Backend Development: Node.js, Express.js, MongoDB, REST APIs, JWT Auth, MVC Architecture

Core CS Concepts: Data Structures & Algorithms, OOP, DBMS, OS, CN

Tools & Platforms: Git, GitHub, Postman, VS Code, Render, Vercel, Excel, GitHub Copilot, Cursor AI

Soft Skills: Problem Solving, Communication, Debugging, Team Collaboration, Logical Thinking, Adaptability

Education

B.Tech - Yeshwantrao Chavan College of Engineering (YCCE), Nagpur | CGPA: 7.5 | 2025

HSC - Santaji Mahavidyalaya, Nagpur | 91.5% | 2021

SSC - Sunrise English High School, Amravati | 74.2% | 2019
